

MICROCHIPPING

The Michigan Humane shelters take in approximately 15,000 stray animals each year, most of whom have no form of identification. Tragically, less than 10% of these companion animals are ever reunited with their owners.

Be sure that your pet always wears a non-choke type collar, a current identification tag and a license from your municipality. (Some areas do not require cats to be licensed, but that number is declining annually.)

In addition, the Michigan Humane Society recommends **microchipping** as a great way to provide your pet with a safe, permanent, and *unalterable* form of ID.

The cost of having your pet microchipped is minimal when compared to your family's pain if a beloved companion animal is lost.

You will receive a discount on the cost of microchipping at the time of adopting a companion animal from MHS.

Call one of the Michigan Humane Society veterinary medical centers now for a microchipping appointment. *It could prevent an enormous amount of heartbreak if your dog or cat ever does get lost.*
